# ● COMPANY PROFILE

- VLLRO is an international company focused on the research and development and manufacturing of water purification equipment, committed to providing customers around the world with efficient, economical and environmentally friendly water purification solutions. From home water purifiers to commercial water purification systems, we promise to protect the purity of every drop of water with superior quality, ushering in a new era of healthy drinking water. VLLRO water treatment equipment has become an important means to solve the problem of water shortage and environmental pollution, and is widely used in drinking water treatment, commercial and engineering water, to bring healthy and safe water protection for users around the world.

# PRODUCT INTRODUCTION

## ● VLLRO drinking pure water machine/ ວ່າ ສຸ່ນ ລົງ ກຸສຕີ ເວລີ ຊະ ຊຸດ VLLRO

## ► Product introduction

VLLRO Direct drinking pure water machine is a small and convenient direct drinking pure water manufacturing equipment, which can quickly treat the water source to the pure direct drinking water standard, suitable for home, commercial use, and can also be used as a small water production equipment. And the equipment is simple to operate, easy to maintain, high water standard, very suitable for Southeast Asian countries and regions.

## ► Specification parameter

0.15T/H			
Equipment size	81cm*56cm*90cm	Water yield	0.15T/H
Desalination rate	99.40%	Working water pressure	0.2-0.4MPa
Membrane shell material	plastic	RO Film Brand	Hui Tong
Filter tank filling material	PP	Processing flow	pp → RO
Precision filter	PP cotton	voltage	110V/220V/380V
Raw water inlet	1	Raw water outlet	DN20

# PRODUCT INTRODUCTION

## VLLRO ultrafilter purification machine/ ວັດທະນະລົບກາງສູງ ຕະຫຼາມ ຕ ດີວິຈານ ຖະຫານ

## ► Product introduction

VLLRO Ultrafilter purification machine is a small ultrafiltration filtration equipment, can be adapted to different water sources. The water quality is quickly treated as domestic water standard, suitable for home and commercial use. The equipment has low maintenance cost and simple operation, which is very suitable for use in Southeast Asian countries and regions and can provide clean water for users.

## ► Specification parameter

	3000L/H		
Equipment size	78cm*52cm*90cm	Water yield	3T/H
Applicable water temperature	4-45℃	Working water pressure	0.1-0.4MPa
preprocessing	PP cotton	preprocessing	Compressed carbon
Ultrafiltration membrane	Custom ultrafiltration membranes	Processing flow	carbon→PP
Influent turbidity	1-5NTU	voltage	110V/220V/380V
Water outlet	1cm	Pure water inlet	DN20

# PRODUCT INTRODUCTION

## ● VLLRO softening filter water machine/ ວ່າ ສຸ່ນວະນຫດຮ່າງ ນິຟັດສບ່ວເຕະກີສາ ຕ ວ່າ

## ► Product introduction

VLLRO softening filter machine is a small water softening filter equipment, which can effectively solve the problem of hard water quality, remove the water scale in the water, and provide healthy soft water supply for home and commercial scenarios. And the equipment does not pick water sources, suitable for use in various countries and regions in Southeast Asia.

# ► Product introduction

Softening water purification equipment, professional to solve the problem of hard water quality, remove the hardness components of water, such as calcium, magnesium ions, so as to solve a series of problems related to water hardness. The interior is filled with food grade resin, and the sand carbon and PP cotton filter system in advance can meet the soft water and filter. Automatic washing, easy operation, can meet a variety of scenarios.
